## PROJECTS

---

### The HungryPaws Website

#### Personal Project

- Developed a full-stack pet services platform using HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, AWS, and Google OAuth.
- Built a customer-facing website showcasing pet grooming, pet hotel, and business information with responsive UI/UX.
- Developed an online booking system supporting both guest and registered users.
- Created employee and admin portals for attendance, leave management, payroll, scheduling, booking approvals, and business insights.
- Used AWS services for file uploads.

### Studio Ledger

#### Personal Project

- Developed a full-stack finance and membership management system for a dance studio using HTML, CSS, JavaScript, Node.js, and Supabase.
- Built tools to track studio rental payments, member attendance, and outstanding balances across multiple sessions.
- Implemented member account portals displaying payment history, total sessions attended, and current account balances.
- Developed administrative features for membership management, payment monitoring, and member approval workflows.

### Bawz Complex Linktree Website

#### Comissioned Project

- Developed a custom full-stack platform using HTML, CSS, JavaScript, and Node.js for a dance studio.
- Centralized class registrations, social media links, announcements, videos, and studio information.
- Built an admin dashboard for managing content, links, cards, and website updates without code changes.
